Performance and Portfolio Update

- The Fund underperformed the benchmark Russell 1000 Index¹ in the second quarter. Company specific exposures were the largest detractor to return. From a factor perspective, the Fund had a positive contribution to relative returns from the tilt toward profitability and lower volatility factors and a negative contribution from earnings yield and earnings quality factors.
- The overweight towards earnings yield was the largest factor detractor as value stocks continued to underperform growth stocks for the year.
- The factor tilt towards companies with higher profitability and lower volatility added to relative performance. An overweight to companies with higher earnings quality detracted from relative results.
- Environmental, social and governance (ESG) factors, as measured by the Pax Sustainability Score, detracted from performance for the period. The Fund overweights its portfolio towards companies with ESG strength. During the period, companies with stronger ESG profiles trailed those with weaker ESG profiles.
- Industry exposures, which are driven by the factor and ESG tilts, provided a positive boost to relative returns for the quarter. Particularly, an underweight position to the lagging Energy sector benefitted relative performance. Company-specific exposure detracted from relative results.

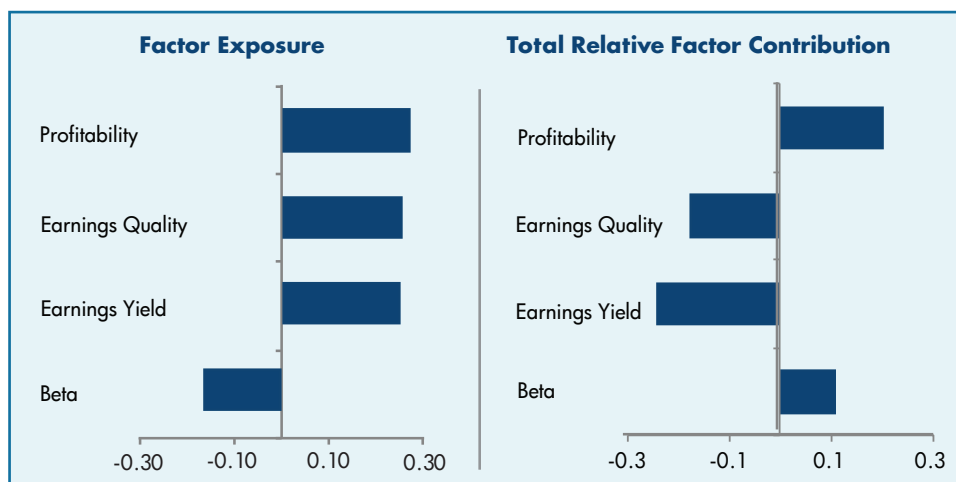

Returns (%)⁶

As of June 30, 2017

	Average Annual Returns (%)						
	3-month	YTD	1-year	3-year	5-year	10-Year	Since Inception
Pax ESG Beta Quality Fund (Without maximum sales charge)							
Individual Investor Class (PXWGX) (Inception Date: 6/11/97)	2.55	8.49	15.43	7.82	12.96	6.60	5.01
Class A (PXGAX) (Inception Date: 5/1/13) ⁷	2.51	8.47	15.38	7.81	12.96	6.60	5.01

Russell 1000 Index ¹	3.06	9.27	18.03	9.26	14.67	7.29	—
Lipper Multi-Cap Core Funds Index ⁹	2.86	8.60	18.14	7.56	13.64	6.21	—
Pax ESG Beta Quality Fund (With maximum 5.50% sales charge) Class A (PXGAX) (Inception Date: 5/1/13)							
	-3.13	2.51	9.00	5.80	11.69	6.00	4.71

Performance data quoted represents past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain performance for the most recent month-end call 800.767.1729 or visit www.paxworld.com.

Total annual Pax ESG Beta Quality Fund operating expenses, gross of any fee waivers or reimbursements, for Individual Investor Class, Class A, and Institutional Class shares are 0.90%, 0.90% and 0.65%, respectively as of 5/1/2017 prospectus.

Past performance is no guarantee of future results.

RISKS: Equity investments are subject to market fluctuations, the fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings.

Effective June 30, 2016 the Pax Growth Fund (the "Predecessor Fund") was renamed the Pax ESG Beta Quality Fund (the Fund). The Predecessor Fund is treated as the survivor of the renaming for accounting and performance reporting purposes. Accordingly, all performance and other information shown for the Fund for periods prior to 6/30/2016 is that of the Predecessor Fund.

- ¹ The Russell 1000 Index measures the performance of the largest 1,000 US companies representing approximately 90% of the investable US equity market. One cannot invest directly in an index.
- ² Weighted Average is an average in which each quantity to be averaged is assigned a weight. These weightings determine the relative importance of each quantity on the average.
- ³ Forward Price-Earnings Ratio or P/E FY1 ratio is a ratio for valuing a company that measures its current share price relative to its per-share earnings over the next 12 months.
- ⁴ Return on Equity: The amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.
- ⁵ An Ex-ante Beta is used for Funds with less than 2 years of performance history under its new mandate. The Ex-Ante Beta is calculated using a multi-factor risk model. Beta explains common variations in stock returns due to different stock sensitivities to the market relative to its underlying benchmark for the current period, not historical. A beta for a benchmark is 1.00: a beta greater than 1.00 indicates above average volatility and risk.
- ⁶ Figures include reinvested dividends, capital gains distributions, and changes in principal value.
- ⁷ The performance information shown for Class A represents the performance of the Individual Investor Class shares for the period prior to Class A inception. Expenses have not been adjusted to reflect the expenses allocable to Class A shares. Class A inception date return since May 1, 2013 is 11.93% (annualized). A 1.00% CDSC (contingent deferred sales charge) may be charged on any shares sold within 18 months of purchase over \$1 million.
- ⁸ The performance information shown for Institutional Class shares represents the performance of the Individual Investor Class shares for the period prior to Institutional Class inception (April 2, 2007). Expenses have not been adjusted to reflect the expenses allocable to Institutional Class shares. If such expenses were reflected, the returns would be higher than those shown. Institutional Class shares average annual return since April 2, 2007 is 7.42% (annualized).
- ⁹ The Lipper Multi-Cap Core Funds Index tracks the results of the 30 largest mutual funds in the Lipper Multi-Cap Core Funds Index Average. The Lipper Multi-Cap Core Funds Index Funds Average is a total return performance average of mutual funds tracked by Lipper, Inc. that invest in a variety of market capitalization ranges without concentrating 75% of their equity assets in any one market capitalization range over an extended period of time. These funds typically have average characteristics compared to the S&P SuperComposite 1500 Index. One cannot invest directly in an index.
