About the Sub-Adviser

Impax Asset Management Ltd, sub adviser to the Pax Global Environmental Markets Fund, is a leading global equity specialist, investing in companies active in the rapidly growing and inefficiently priced resource optimization markets. Impax has been researching and managing portfolios of publically traded stocks and private equity in this space for over 18 years, with 30 investment team members. Impax has offices in London, New York, and Hong Kong. Impax Asset Management LLC (formerly Pax World Management LLC) and Impax Asset Management, Ltd. are both owned by Impax Asset Management Group plc.

[§]The Morningstar style box is a nine-square grid that classifies securities by size along the vertical axis and by style (Value and Growth Characteristics) along the horizontal axis. Morningstar's equity style methodology uses a building block, holdings-based approach. Funds are classified as large, mid, or small based on the market capitalization of its portfolio holdings. Style is determined at the stock level and then those attributes are rolled up to determine the overall investment style of a fund.

~The Environmental Markets Classification System (EMCS) is a comprehensive global classification system for environmental markets. Environmental market companies are defined as providing products and services that deliver solutions to environmental challenges, and include environmental technology, also sometimes referred to as "clean tech." Performance data quoted represent past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For most recent month-end performance information visit www.paxworld.com.

Risk: Equity investments are subject to market fluctuations, the fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings. Emerging market and international investments involve risk of capital loss from unfavorable fluctuations in currency values, differences in generally accepted accounting principles, economic or political instability in other nations or increased volatility and lower trading volume.

^eInception of Class A shares is May 1, 2013. The performance information shown for Class A represents the performance of the Individual Investor Class shares for the period prior to Class A inception. Class A (NAV) Inception date return since May 1, 2013 is 9.78 (annualized). Class A: A 1.00% CDSC (contingent deferred sales charge) may be charged on any shares sold within 18 months of purchase over \$1million.

^xThe MSCI ACWI Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 46 country indexes comprising 23 developed and 23 emerging market country indexes. The developed market country indexes included are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The emerging market country indexes included are: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates. One cannot invest directly in an index.

^{xx}The MSCI World Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI World (Net) Index consists of the following 23 developed market country indices: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States. Performance for the MSCI World Index is shown "net," which includes dividend reinvestments after deduction of foreign withholding tax. One cannot invest directly in an index.

^fThe FTSE Environmental Opportunities Index Series measures the performance of global companies that have significant involvement in environmental business activities, including renewable and alternative energy, energy efficiency, water technology and waste and pollution control. The FTSE Environmental Opportunities Index Series requires companies to have at least 20% of their business derived from environmental markets and technologies. The FTSE Environmental Opportunities Index Series is published by a joint venture of Impax Asset Management, Ltd. ("Impax") with FTSE International. Impax is also the sub-adviser to the Pax Global Environmental Markets Fund. One cannot invest directly in an index.

¹Standard Deviation measures a Fund's variation around its mean performance; a high standard deviation implies greater volatility.

²Beta reflects the sensitivity of a Fund's return to fluctuations in its benchmark; a beta for a benchmark is 1.00; a beta greater than 1.00 indicates above average volatility and risk.

³Alpha is a coefficient measuring risk-adjusted performance, considering the risk due to the specific security, rather than the overall market. A positive alpha reflects relative risk-adjusted performance of the Fund versus its benchmark.

⁴R-Squared is a measure of how much a portfolio's performance can be explained by the returns from the overall market (or a benchmark index). The measure ranges from 0, which means that the Fund's performance bears no relationship to the performance of the benchmark, to 100, which means that the Fund's performance is perfectly synchronized with the performance of the benchmark.
