Performance data quoted represent past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For most recent month-end performance information, visit www.paxworld.com.

[Ⓔ]Average annual returns for the Institutional Class. Figures include reinvested dividends, capital gains distributions, and changes in principal value.

Total annual Small Cap Fund operating expenses, gross of any fee waivers or reimbursements are 0.95% for the Institutional Class, 1.19% for the Individual Investor Class and 1.19% for Class A as of the 05/01/2018 prospectus.

You should consider a fund's investment objectives, risks, and charges and expenses carefully before investing. For this and other information, call 800.767.1729 or visit www.paxworld.com for a fund prospectus and read it carefully before investing.

NOT FDIC INSURED - MAY LOSE VALUE - NO BANK GUARANTEE

Over the 10-year period, Pax Small Cap Fund (PXSIX) ranks high in its peer group for controlling volatility and reducing risk.

Percentile Rankings

as of 03/31/2018

*Comparison based on the Lipper Small Cap Core Classification. The Fund's Standard Deviation for the 10 year period ranked 447 out of 513. The Fund's Beta for the 10 year period ranked 470 out of 513. The Fund's Downside Capture for the 10 year period ranked 489 out of 513. The Fund's Standard Deviation for the 5 year period ranked 691 out of 698. The Fund's Beta for the 5 year period ranked 686 out of 698. The Fund's Downside Capture for the 5 year period ranked 696 out of 698. The Fund's Standard Deviation for the 3 year period ranked 805 out of 813. The Fund's Beta for the 3 year period ranked 796 out of 813. The Fund's Downside Capture for the 3 year period ranked 782 out of 813. The Fund's Standard Deviation for the 1 year period ranked 882 out of 991. The Fund's Beta for the 1 year period ranked 914 out of 991. The Fund's Downside Capture for the 1 year period ranked 783 out of 991. A lower percentile for these three risk measurements indicates a higher peer ranking.

Alpha (Better than)

Alpha⁴

as of 03/31/2018

PXSIX	5 year	10 Year
Percentile Rank	Top 5%	Top 14%
Better than	95%	86%
Rank	32	69
# of Funds	698	513

Comparison based on the Lipper Small Cap Core Classification. The Fund's Alpha for the 1 year period had a rank of 571 out of 991. The Fund's Alpha for the 3 year period had a rank of 474 out of 813. A lower rank for Alpha indicates a higher peer ranking.

Risk: Equity investments are subject to market fluctuations. The fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings. Funds that emphasize investments in smaller companies generally will experience greater price volatility.

Fund Objective: The Pax Small Cap Fund's primary objective is to seek long-term growth of capital.

¹ The Morningstar Ratings[™] shown are as of 3/31/18 and are based on risk-adjusted 3-, 5-, and 10-year (if applicable) returns, and past performance is no guarantee of future results. The Pax Small Cap Fund (PXSIX) Morningstar ratings were 4 stars out of 627 funds overall, 2 stars out of 627 funds for 3-years, 4 stars out of 542 funds for 5-years, 4 stars out of 400 funds for 10-years. Ratings are subject to change every month. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating[™] based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Ratings[™] for a fund is derived from a weighted average of the performance figures associated with its 3-, 5, and 10-year Morningstar Ratings[™] metrics.

² Lipper Small Cap Core Average is the average return of the entire Lipper Small Cap Core classification. The Lipper Small Cap Core Funds Average is a total return performance average of the mutual funds tracked by Lipper, Inc. that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) below Lipper's USDE small-cap ceiling. Small cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P Small Cap 600 Index. The Lipper Small Cap Core Funds Index is not what is typically considered to be an "index" because it tracks the performance of other mutual funds rather than the changes in the value of a group of securities, a securities index or some other traditional economic indicator. One cannot invest directly in index.

³ The Russell 2000 Index ("Benchmark") is an unmanaged index and measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. One cannot invest directly in index.

⁴ Risk is measured by standard deviation. Standard Deviation measures a Fund's variation around its mean performance; a high standard deviation implies greater volatility.

¹ Standard Deviation measures a Fund's variation around its mean performance; a high standard deviation implies greater volatility.

² Beta reflects the sensitivity of a Fund's return to fluctuations in its benchmark; a beta for a benchmark is 1.00: a beta greater than 1.00 indicates above average volatility and risk.

³ Downside capture - measures an investment manager's overall performance in down-markets and is used to evaluate how well or poorly an investment manager performed relative to an index during periods when that index has dropped. A downside capture ratio less than 100 indicates that the investment manager has outperformed its index during down-markets, while downside capture ratio greater than 100 indicates that the investment manager has underperformed its index during down-markets.

⁴ Alpha is a coefficient measuring risk-adjusted performance, considering the risk due to the specific security, rather than the overall market. A positive alpha reflects relative risk-adjusted performance of the Fund versus its benchmark.
