A core growth strategy that invests in a portfolio of companies with consistent earnings growth potential, defensible business models, effective management and reasonable valuations relative to sector peers.

- Bottom-up stock selection is focused on earnings growth consistency, capital discipline, relative valuation and potential catalysts to drive stock price appreciation.
- Environmental, Social and Governance (ESG) research is an integral component of fundamental analysis.
- A high conviction portfolio of 40 to 60 stocks closely monitored to limit unintended sector and portfolio risk exposures and to maintain a consistent core-growth investment style.

RISK: Equity investments are subject to market fluctuations, the fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings. The Fund invests in foreign securities which involve greater volatility and political, economic, and currency risks as well as differences in accounting methods. The Pax Large Cap Fund is new and has a limited operating history.

^fLipper Large-Cap Core Funds Index invests at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) greater than 300% of their dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Large-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500 Index. One cannot invest directly in an index.

[^]The S&P 500 Index is an unmanaged index of large capitalization common stocks. One cannot invest directly in an index.

You should consider a fund's investment objectives, risks, and charges and expenses carefully before investing. For this and other information, call 800.767.1729 or visit www.paxworld.com for a fund prospectus and read it carefully before investing.
