About the Index

MSCI EAFE ESG Index

The MSCI EAFE ESG Index is a free float-adjusted market capitalization weighted index designed to measure the performance of equity securities of issuers in developed countries around the world excluding the U.S. and Canada that have high ESG ratings relative to their sector and industry peers, as rated by MSCI ESG Research.

The Index seeks to mirror construction of the MSCI EAFE Index, including sector and regional diversification. The MSCI EAFE Index consists of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom.

One cannot invest directly in an index.

Portfolio Managers

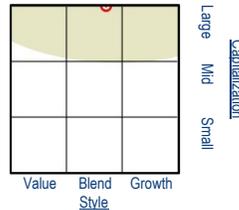

From left to right: **Scott LaBreche**, Director of Portfolio Analytics and Index Optimization, Portfolio Manager of the Pax MSCI International ESG Index Fund and the Pax Ellevest Global Women's Index Fund; **Chris Brown**, Chief Investment Strategist, Portfolio Manager of the Pax Balanced Fund and the Pax MSCI International ESG Index Fund; **Greg Hasevlat**, Sustainability Research Analyst, Portfolio Manager of the Pax MSCI International ESG Index Fund

An international index fund driven by a sustainable investing approach.

- The Fund seeks investment returns that closely correspond to the price and yield performance, before fees and expenses, of the MSCI EAFE ESG Index.
- Index constituents reflect high environmental, social and governance (ESG) ranked companies by sector as rated by MSCI ESG Research.
- We believe that companies with strong ESG performance are better at managing and mitigating risk, and more focused on the long term.

Index Performance and Risk (Annualized) - Since Index Inception 10/1/2007

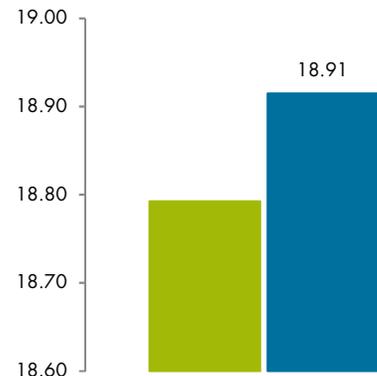

as of 03/31/17

MSCI EAFE ESG Index has outperformed with lower risk relative to the MSCI EAFE Index over time.

Higher Return

Lower Risk

■ MSCI EAFE ESG Index ■ MSCI EAFE Index

The MSCI EAFE ESG Index has outperformed the MSCI EAFE Index by 0.58% annualized from 10/01/07 to 03/31/17 (cumulative outperformance from 10/01/07 to 03/31/17 is 5.97%). Comparable returns since index inception are shown gross which includes dividend reinvestment without a reduction from tax. Past performance is no guarantee of future results. Index performance is not necessarily representative of Fund performance.

[§]The Morningstar style box is a nine-square grid that classifies securities by size along the vertical axis and by style (Value and Growth Characteristics) along the horizontal axis. Morningstar's equity style methodology uses a building block, holdings-based approach. Funds are classified as large, mid, or small based on the market capitalization of its portfolio holdings. Style is determined at the stock level and then those attributes are rolled up to determine the overall investment style of a fund.

¹Weighted Average is an average in which each quantity to be averaged is assigned a weight. These weightings determine the relative importance of each quantity on the average.

RISK: The Fund does not take defensive positions in declining markets. The Fund's performance would likely be adversely affected by a decline in the Index. Equity investments are subject to market fluctuations, the fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings. Emerging markets and international investments involve risk of capital loss from unfavorable fluctuations in currency values, differences in generally accepted accounting principles, economic or political instability in other nations or increased volatility and lower trading volume. Investments in Asia/Pacific increase the impact of events and developments associated with the region can adversely affect performance.

On 3/31/2014 Pax World International Fund and Pax MSCI EAFE ESG Index ETF merged into the Pax MSCI International ESG Index Fund (the Fund), a passively managed index fund which seeks investment returns that closely correspond to the price and yield performance, before fees and expenses, of the MSCI EAFE ESG Index. Based on the similarity of the Fund to Pax MSCI EAFE ESG Index ETF, Pax MSCI EAFE ESG Index ETF (the Predecessor Fund) is treated as the survivor of the mergers for accounting and performance reporting purposes. Accordingly, all performance and other information shown for the Fund for periods prior to 3/31/2014 is that of the Predecessor Fund.

You should consider a fund's investment objectives, risks, and charges and expenses carefully before investing. For this and other information, call 800.767.1729 or visit www.paxworld.com for a fund prospectus and read it carefully before investing.

Inception date for Institutional Class shares is that of the Predecessor Fund, January 27, 2011. Inception date of Individual Investor Class is March 31, 2014. The returns shown for Individual Investor Class shares for periods prior to March 31, 2014 are those of the Predecessor Fund. These returns have been adjusted to reflect the expenses allocable to Individual Investor Class shares.

[Ⓐ]Figures include reinvested dividends, capital gains distributions, and changes in principal value.

²Standard Deviation measures a Fund's variation around its mean performance; a high standard deviation implies greater volatility.

³Beta reflects the sensitivity of a Fund's return to fluctuations in its benchmark; a beta for a benchmark is 1.00: a beta greater than 1.00 indicates above average volatility and risk.

⁴Alpha is a coefficient measuring risk-adjusted performance, considering the risk due to the specific security, rather than the overall market. A positive alpha reflects relative risk-adjusted performance of the Fund versus its benchmark.

⁵R-Squared is a measure of how much a portfolio's performance can be explained by the returns from the overall market (or a benchmark index). The measure ranges from 0, which means that the Fund's performance bears no relationship to the performance of the benchmark, to 100, which means that the Fund's performance is perfectly synchronized with the performance of the benchmark.

⁶Tracking Error is the divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark.

⁷The management fee is a unified fee that includes all of the costs and expenses of the Fund (other than taxes, charges of governmental agencies, interest, brokerage commissions incurred in connection with portfolio transactions, distribution and/or service fees payable under a plan pursuant to Rule 12b-1 under the 1940 Act and extraordinary expenses), including accounting expenses, administrator, transfer agent and custodian fees, Fund legal fees and other expenses.

[†]The MSCI EAFE ESG Index is a free float-adjusted market capitalization weighted index designed to measure the performance of equity securities of issuers in developed countries around the world excluding the U.S. and Canada that have high ESG ratings relative to their sector and industry peers, as rated by MSCI ESG Research. Performance for the MSCI EAFE ESG Index is shown "net", which includes dividend reinvestments after deduction of foreign withholding tax. One cannot invest directly in an index.

[‡]The MSCI EAFE (Europe, Australasia, Far East) Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. The MSCI EAFE Index consists of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom. Performance for the MSCI EAFE Index is shown "net", which includes dividend reinvestments after deduction of foreign withholding tax. One cannot invest directly in an index.

⁷The performance of the Lipper International Large-Cap Core Funds Index represents the total returns of the funds in the indicated category, as defined by Lipper. The performance of the Index includes expenses associated with a mutual fund, such as investment management fee. These expenses are not identical to the expenses charged by the Fund. One cannot invest directly in an index.
