**A core strategy that fully integrates analysis of ESG risks and opportunities and invests in a portfolio of companies we believe have strong prospects and attractive valuations.**

- Bottom-up stock selection focuses on identifying companies with favorable business trends, superior management, and potential catalysts that can drive stock price appreciation.
- Disciplined valuation process evaluates long-term upside potential and downside risk.
- Environmental, Social and Governance (ESG) research is an integral component of the investment process from idea generation to risk management.
- A high conviction portfolio of 40 to 60 stocks is closely monitored to limit unintended sector and portfolio risk exposures and to maintain a consistent core investment style.

**RISK:** Equity investments are subject to market fluctuations, the fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings. The Pax Large Cap Fund is new and has a limited operating history.

<sup>f</sup>Lipper Large-Cap Core Funds Index invests at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) greater than 300% of their dollar-weighted median market capitalization of the middle 1,000 securities of the S&P SuperComposite 1500 Index. Large-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500 Index. One cannot invest directly in an index.

<sup>^</sup>The S&P 500 Index is an unmanaged index of large capitalization common stocks. One cannot invest directly in an index.
