A risk-focused mid cap strategy driven by fundamental stock selection of companies with attractive valuations and high quality financial characteristics.

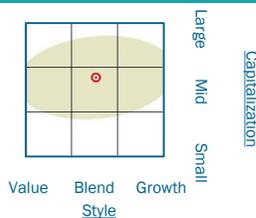

- Applies a fundamental stock selection process to discover reasonably priced companies with strong or improving financials, relatively high free cash flow and effective management teams.
- Maintains a focus on risk management and integrates environmental, social and governance (ESG) research into fundamental analysis.
- The management team has utilized the same relative value investment philosophy and fundamental bottom-up stock selection process with the Pax Small Cap Fund since 2008.

[†]Morningstar Sustainability Rating™ measures how well the companies in a fund's portfolio manage their environmental, social and governance (ESG) risks and opportunities relative to the fund's peers. First, a Morningstar Portfolio Sustainability Score™ ranging from 0 to 100 is derived from an asset weighted average of the underlying company ESG scores quarterly. Next, scored funds are rated monthly: The top 10% receive 5 globes (High), the next 22.5% receive 4 (Above Average), the next 35% receive 3 (Average), the next 22.5% receive 2 (Below Average), and the bottom 10% receive 1 (Low). Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score. A higher score indicates that a fund, on average, has more of its assets invested in companies that score well according to the Sustainalytics methodology. For details, visit <http://morningstar.com/company/sustainability>. © 2018 Morningstar. All rights reserved. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. Sustainability Score for the Pax Mid Cap Fund as of 12/31/2018 is 44.91. Percent Rank in Category is 13 and Sustainability Rating is 4 globes as of 2/28/2019. Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

[§]The Morningstar style box is a nine-square grid that classifies securities by size along the vertical axis and by style (Value and Growth Characteristics) along the horizontal axis. Morningstar's equity style methodology uses a building block, holdings-based approach. Funds are classified as large, mid, or small based on the market capitalization of its portfolio holdings. Style is determined at the stock level and then those attributes are rolled up to determine the overall investment style of a fund.

[~]The Russell Midcap Index ("Benchmark") measures performance of the mid-capitalization sector of the US equity market. The index is a float-adjusted, capitalization-weighted index of the 800 smallest issuers in the Russell 1000 Index. The index is a subset of the Russell 1000 Index and serves as the underlying index for the Russell Midcap Growth and Value Index series. The index is reconstituted annually. One cannot invest directly in any index.

^{*}The Russell 2000 Index is an unmanaged index and measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. One cannot invest directly in any index.

[^]The S&P 500 Index is an unmanaged index of large capitalization common stocks. One cannot invest directly in an index.

¹Weighted Average is an average in which each quantity to be averaged is assigned a weight. These weightings determine the relative importance of each quantity on the average.

²Standard deviation measures a Fund's variation around its mean performance; a high standard deviation implies greater volatility.

³Sharpe ratio is a measure that indicates the average return minus the risk-free return divided by the standard deviation of return on an investment.

Performance data quoted represent past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For most recent month-end performance information, visit www.paxworld.com.

^gFigures include reinvested dividends, capital gains distributions, and changes in principal value.

RISK: Equity investments are subject to market fluctuations, the fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings. Funds that emphasize investments in mid-size and smaller companies generally will experience greater price volatility. The Pax Mid Cap Fund is new and has a limited operating history.

^fThe Lipper Mid-Cap Core Funds Index tracks the results of the 30 largest mutual funds in the Lipper Mid-Cap Core Funds Average. The Lipper Mid-Cap Core Funds Average is a total return performance average of the mutual funds tracked by Lipper, Inc. that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) below Lipper's USDE mid-cap ceiling. Mid-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P MidCap 400 Index. The Lipper Mid-Cap Core Funds Index is not what is typically considered to be an "index" because it tracks the performance of other mutual funds rather than the changes in the value of a group of securities, a securities index or some other traditional economic indicator. Investors cannot invest directly in any index.

You should consider a fund's investment objectives, risks, and charges and expenses carefully before investing. For this and other information, call 800.767.1729 or visit www.paxworld.com for a fund prospectus and read it carefully before investing.
